Projects

AI Attendance App - Remote, Singapore	Sep 2024 - Oct 2025
<i>Product Manager</i>	
• Spearheaded the development of an innovative AI-powered attendance application to streamline and digitize student attendance management in educational institutions. The platform enabled seamless QR code check-ins for students and enforced attendance validity using precise geofencing technology. An advanced AI-driven leave request analysis feature was integrated, allowing the system to intelligently assess absence requests based on predefined criteria and behavioral patterns.	
• Key Features: QR Check-in Student, Geofence location, AI Leave Request Analysis	
Wool.id HRIS - Bandung, Indonesia	May 2023 - Sep 2025
<i>Head of Product and Technology</i>	
• Led the ideation of Wool.id, an end-to-end talent and career management platform, developed to empower job seekers and organizations in the digital economy. Wool.id introduced a seamless resume builder and profiling assessment enabling users to craft impactful CVs and profile with ease. An integrated job portal and curated talent pool facilitated efficient matchmaking between candidates and hiring companies, helping businesses source top talent, and empower existing employee with the assessment.	
• Key Features: Assessment Platform, Schedule Management, Resume Builder, Job Portal, Talent Pool.	
Kolektiva (Real World Asset) - Remote, Bali.	Jun 2024 - Aug 2024
<i>Product Manager</i>	
• Directed the development of Kolektiva, a pioneering platform for tokenizing and trading real-world assets, including properties and investment portfolios. The solution enabled seamless listing and management of physical assets, transforming them into tradable digital tokens that made investment accessible for a wider audience.	
• Key Features: Listing fractional investment asset, buy/sell tokenized asset, portfolio asset management.	
Tenzro NFT - Remote, UK.	Mar 2024 - May 2024
<i>Project Manager</i>	
• Led the project development of Tenzro, an AI-driven NFT platform built to redefine digital asset value and management. Tenzro utilized advanced AI context embedding technology, enriching NFT metadata and enhancing discoverability and personalization for collectors and creators. The platform enabled seamless NFT drops, simplified the minting process, and offered comprehensive tools for NFT asset management including buying and selling on a secure, user-friendly marketplace.	
• Key Features: NFT Minting, Drops, Buy/Sell Marketplace, NFT Asset Management, Airdrop.	
Wool AI Chatbot - Remote, Bandung	Mar 2025 - Apr 2025
<i>AI Developer</i>	
• Engineering the development of Wool AI, a next-generation WhatsApp chatbot powered by advanced Large Language Models (LLMs) through the Gemini API. Created to deliver rapid, intelligent, and context-aware conversations, Wool AI provided real-time chat support, boosted product sales with effective conversational flows, and efficiently handled early-stage user engagements.	
• Key Feature: AI Support Assistant, AI Product Explainer, AI Chat Appointment.
